DETAILED ACTION

Remarks

1. This communication is responsive to the amendment and response filed on 10/31/05. Claims 1-36 are presented for examination.

Allowable Subject Matter

1. Claims 1-36, after further reconsideration and search, are deemed to contain allowable subject matters and are allowed over the prior art.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a method for resampling graphics data of a source image to produce a destination image having a higher resolution.

It is well known in the art, as evidenced by Hau (EP 0706262 A2), to use a resampling circuit to produce a destination image having a higher resolution from an input sample by selecting from different number of frequency characteristics (see col. 3, lines 31-38). However, the prior art of record fails to disclose a resampling circuit operable in the manner recited in claims 1-36, wherein output sample values are calculated from an input graphics data having corresponding input samples values by calculating from a sample set of input graphics data an angular frequency value for a sine-wave model value and determining whether the frequency value is in a frequency range; where the frequency value is in the range, determining from the sample set a first model from which output sample values are calculated, and where the frequency value

is out of the range, determining from the sample set a second model from which output sample values are calculated; and calculating output sample values from the resulting model (as recited in claims 1 and 27). Independent claims 13, 16, 26, and 31 are allowed over the prior art for the same reasons indicated in the previous office action.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
